SKILLS

`Dart` `Flutter` `Java` `Javascript` `Php` `C#` `MySql` `HiveDB` `Firebase` `Laravel` `.NET` `Heroku` `Github`

PROJECTS

eXpense Tracker - Flutter (11/2020 - Present)
- It's my first **production ready Flutter** app about to be deployed to playstore , used for tracking daily expenses, it's main feature is **privacy**, all user's expense and categories information is stored only in user device, and out of our reach.
- Core Modules are expense **analytics**, spreadsheet exporting, backup restore mechanism, currency changes, app lock which integrates with local device **Fingerprint authentication** and custom Pin Lock and a **Dark Mode** Theming for better user experience.
- Used **Hive** as a **NoSQL** cached based database for faster **Asynchronous** performance

Android Apps - Native Java (05/2019 - 08/2019)
- Battery Protector - App for protecting mobile device from over heating and over charging.
- Fast Record - One Touch Start/Stop Voice Recording app , which records in AMR audio codec for small audio files
- LogicGate Game - Fun Game designed for learning and predicting outcome of 7 logic gates depending on the 2 switches

B.E Project Tracker (08/2018 - 12/2018)
- It is a Task assessment and monitoring system , Modules included in this project are Email Integration with admin control, Role Management, Task Creation , Task Review, Task Remark, Score Analytics, Notifications, etc.
- Used Laravel, Php, MySQL, HTML, CSS, JavaScript, JQuery, Heroku

Flight Reservation System (11/2019 - 12/2019)
- It's core modules are , seat booking, ticket generation, price calculations as per the seat class , booking resuming and cancellation , credit card integration, etc.
- Used ASP.NET, C# , SQL , HTML , CSS , JavaScript, Bootstrap
